

System for People Counting

ECOSOPH offers as a specialized developer of sensor systems an efficient solution for people counting in the retail sector. The ECOSOPH people counting system enables individual solutions for store networks of any size.

- Modular system: From the inexpensive and uncomplicated counting solution in individual stores to a comprehensive analytics solution for worldwide branch networks.
- 3D depth sensor technology and computer vision algorithms enable a precision of around 99%
- Data protection compliant
- Online connectivity: Store utilization and customer frequency in real time on the smartphone.
- Monitor display with customer traffic light can be designed individually in your corporate design.
- Quick installation (plug & play): start-up on the shelf without without craftsmen, without drilling and screwing, possible within 20 minutes.
- Self-assembly possible.
- Cost-effective: The ECOSOPH system is significantly less than other solutions of comparable precision. - Directly from the manufacturer: Proprietary solution, developed and manufactured in Munich (Germany).
